

I feel you should leave the Indiana No Call List Law Alone. I cannot count the number of calls I used to get before I signed up with the no call list. There is a simply reason that I signed up for this, because I DID NOT want any more calls at all times of the night. Your excuses for accepts to the law have no merit because anyone needed to contact me that has business with me can use the mail. My utlity companies don't call they send a bill, there is no reason for a call from anyone besides family, period.
